Table Data:

Company Name	Sector	Energy (kgCO2)	Waste (kgCO2)	Business Travel (kgCO2)	Month	Year
DHL Group	Other	6035.90	70.00	2887.50	Nov	2024

Energy-efficient Equipment: Upgrading lighting systems to LEDs, improving insulation, and using energy-efficient appliances help minimize electricity consumption, reducing emissions by monthly.

Recycled Materials in Production: Using more recycled materials instead of virgin resources reduces the need for extraction, transportation, and processing, which all contribute to emissions.

Electrifying Fleet: Using more recycled materials instead of virgin resources reduces the need for extraction, transportation, and processing, which all contribute to emissions.
