| DHL Group | Other | 6965.65 | 408.00 | 3753.75 | Jun | 2024 |
| DHL Group | Other | 6338.99 | 430.00 | 4042.50 | May | 2024 |

Energy-efficient Equipment: Upgrading lighting systems to LEDs, improving insulation, and using energy-efficient appliances help minimize electricity consumption, reducing emissions by monthly.

Recycled Materials in Production: Using more recycled materials instead of virgin resources reduces the need for extraction, transportation, and processing, which all contribute to emissions.

Electrifying Fleet: Using more recycled materials instead of virgin resources reduces the need for extraction, transportation, and processing, which all contribute to emissions.
